

MAOR ZEMACH

Systems & Infrastructure Engineer | IT Specialist

052-3136036 • maorize1@gmail.com • Portfolio • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Systems & Infrastructure Engineer with a B.Sc. in Computer Science and a strong passion for DevOps, scripting, and infrastructure automation. Proven experience managing and optimizing complex multi-site enterprise environments (22 sites, 50+ virtual servers, 1,000+ end-users), and automating identity lifecycle processes across hybrid On-Prem AD & M365 directories using PowerShell and Python. Analytical troubleshooter adept at rapid incident response, root cause analysis (RCA), and network diagnostics, with a proactive DevOps mindset focused on eliminating manual toil and improving operational efficiency.

TECHNICAL SKILLS & CERTIFICATIONS

Operating Systems & Directory Services: Windows Server (2016–2022), Active Directory (AD), Azure AD / Entra ID, Microsoft Exchange / Office 365, VMware ESXi / vCenter, Citrix.

Scripting & Automation: PowerShell (Advanced), Python, Bash (Basic).

Networking & Protocols: TCP/IP, DNS, DHCP, Print Server Management, Routing & Switching basics.

Development & DevOps Tooling: Git, GitHub, CI/CD (Netlify), HTML5, CSS3, JavaScript, SQL, C#, C++.

Certifications: AWS Technical Essentials — Amazon Web Services (Valid, issued July 2025).

PROFESSIONAL EXPERIENCE

Systems & Infrastructure Engineer, Dan Hotels

2024 – Present

- Infrastructure Management:** Orchestrate, monitor, and maintain hybrid server and IT infrastructure across a complex multi-site network of 22 hotels and hubs under a unified domain, supporting 50+ VMware VMs and 1,000+ users.
- Identity Lifecycle Automation:** Engineered GUI-enabled PowerShell automation scripts to streamline Onboarding and Offboarding workflows; integrated local Active Directory with Microsoft 365 / Exchange to provision users, dynamically assign licenses, and convert mailboxes to Shared Mailboxes with a single click — eliminating hours of manual toil and human error.
- Directory & Access Control:** Administer identity models, security groups, and Group Policies (GPOs) within Active Directory; developed bulk modification tools in PowerShell to automate large-scale group memberships and calendar delegation via CSV data parsing.
- Application & Platform Support:** Monitor, update, and troubleshoot application delivery infrastructures, including Citrix environments (ensuring high-availability remote access) and enterprise Print Servers.
- Network & Endpoint Diagnostics:** Rapidly diagnose and resolve complex routing, DNS, DHCP, and TCP/IP connectivity issues across distributed endpoints and core server interfaces.
- Standardization & Documentation:** Spearheaded the creation of comprehensive technical wikis, playbooks, and RCA templates, reducing ticket resolution times and boosting overall team efficiency.

Electronic Warfare Systems Operator, Israel Defense Forces (IDF)

2013 – 2016

- Systems Operations:** Operated, monitored, and ensured the operational health of mission-critical computing and electromagnetic systems in high-pressure, real-time tactical environments.
- Operational Readiness:** Conducted physical and software-level health diagnostics under demanding conditions, executing strict protocols to ensure maximum systems uptime.

EDUCATION

B.Sc. in Computer Science, The Academic College of Tel Aviv-Yaffo

2019 – 2023

- Core Coursework:** Operating Systems, Computer Networks, Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Systems (SQL).
- Practical Applications:** Used Git and GitHub for version control in collaborative software projects; worked within Linux environments (Ubuntu / Terminal) during systems-level assignments.

PROJECTS

ATS-Optimized Resume Generator

Python 3.12 • Anthropic Claude API • Git

- Developed a Python-based CLI automation tool that parses resume files and contextually aligns them with specific job descriptions based on key terminology matching.
- Implemented strict prompt-engineering constraints to eliminate LLM hallucinations, ensuring full factual accuracy relative to the source resume.
- Managed secure API key integration using environment variables (.env) and built a conversion pipeline via pdfkit and wkhtmltopdf to compile clean, ATS-compliant single-column PDFs.

Personal IT Portfolio

HTML5 • CSS3 • JavaScript • Netlify • Git

- Engineered a fully responsive, mobile-first portfolio web application to showcase technical IT projects, system tools, and professional milestones.
- Established a robust CI/CD pipeline, configuring automated builds and deployments through Netlify on main-branch commits.
- Hardened the frontend security posture with custom HTTP security headers (X-Frame-Options, XSS Protection) and serverless Netlify Forms to mitigate spam and prevent email exposure.
